## Blackwell Synergy

เป็นฐานข้อมูลวารสารอิเล็กทรอนิกส์ของสำนักพิมพ์ Blackwell Publishing ซึ่งเป็นหนึ่งในผู้นำทางด้านสิ่งพิมพ์และเป็นพันธมิตรกับองค์กรทางด้านการศึกษา การแพทย์มากกว่า 650 องค์กร

ภายในฐานข้อมูลรวบรวมวารสารมากกว่า 850 รายชื่อครอบคลุมสาขาวิชาทางด้าน Physical Sciences, Life Sciences, Medicine, Social Sciences และ Humanities

ให้รายละเอียดทางบรรณานุกรม สารสังเขป และเอกสารฉบับเต็มในรูปแบบของ HTML และ PDF

## ฐานข้อมูล Blackwell-Synergy แบ่งเป็น 2 Collection ได้แก่

(1) Humanities and Social Science : ครอบคลุมสาขา

Arts & Humanities, Business, Economics, Finance,  
Accounting, Math, Stats, Law, Social & Behavioral Science

(2) Science and Medicine : ครอบคลุมสาขา Medicine,

Health Sciences, Life & Physical Sciences, Agricultural &  
Animal Sciences, Engineering & computing

The greatest challenge facing construction executives is how to manage their intellectual capital. The business environment has now entered a knowledge era, where knowledge has become power and learning rapidly and competently has become a pre-eminent strategy for success. Thus, **knowledge** is rapidly becoming more important to organizations than financial resources, market positions, technology and other tangible assets. However, the management of intellectual capital is still an under-charted territory within construction organizations. Managing know-how, know-what, know-why is unlike managing finances or construction plant, yet intellectual investments need to be treated with every bit of care. Learning organizations deliberately and competently manage knowledge as one of their central factors of success in this knowledge economy. It is from this understanding that this paper presents the principles that underly **knowledge management** and invokes a framework which aims at facilitating management of construction organizations' intellectual capital as one of the strategies for improving construction business processes.

## Abstract

Go to section

The greatest challenge facing construction executives is how to manage their intellectual capital. The business environment has now entered a knowledge era, where knowledge has become power and learning rapidly and competently has become a pre-eminent strategy for success. Thus, knowledge is rapidly becoming more important to organizations than financial resources, market positions, technology and other tangible assets. However, the management of intellectual capital is still an under-charted territory within construction organizations. Managing know-how, know-what, know-why is unlike managing finances or construction plant, yet intellectual investments need to be treated with every bit of care. Learning organizations deliberately and competently manage knowledge as one of their central factors of success in this knowledge economy. It is from this understanding that this paper presents the principles that underly knowledge management and invokes a framework which aims at facilitating management of construction organizations' intellectual capital as one of the strategies for improving construction business processes.

## INTRODUCTION

Go to section

The concept of intellectual capital has received extensive press coverage in the last few years and the term 'knowledge management' has now officially entered the vocabulary of many construction managers. However, entering the vocabulary of construction managers is not the same as operationalizing and harnessing the intellectual assets to gain competitive advantage. The concept of knowledge management is not new, but what has been lacking is a methodology for implementing the idea to help construction organizations gain competitive advantage. The main problem of implementing the concept of knowledge management within construction organizations lies in the lack of a methodology for measuring the intellectual capital. Therefore
