Question

Question: I'd like know about research and technical reports in the world. Could you inform me of the following?

- * the total number of technical and research reports in the world
- * the number of technical and research reports in Science, Technology, and Medicine worldwide

*Education Level: Master/Ph.D

Keywords: technical report, research report, world, number

*Category: Ready Reference

Subject: Subject Broad Class: 2: Books. Writing. Paleography. Libraries. Bibliography

Geographic Code:

Reason: Job Assignment

Language of Question: English

Sources Checked:

Answer

*Answer: I'm not finding any information for the total number of technical reports in the world. There are millions and millions. In the United States, the GrayLit network makes some technical reports from U.S. Federal Agencies accessible: <http://graylit.osl.gov/index.html>.

The GrayLit Network is a portal for technical report information generated through federally funded research and development projects. It is a free database that provides access to full-text scientific and technical reports from the following U.S. government agencies: Defense Technical Information Center, Department of Energy, NASA, and Environmental Protection Agency. Reports are available back to 1960, but most are from the early 1990s forward.

The Technical Reports Center at the University of Maryland (USA) contains over two million scientific and technical reports: <http://www.lib.umd.edu/ENGIN/techreports.html>

The Virtual Technical Reports Center there contains links to technical reports, preprints, reprints, dissertations, theses, and research reports of all kinds.
