# Journal of Digital Imaging

## Introduction to Paper by R. G. Jost, M.D., et al, "PACS Experience as a Motivation for a Campus-wide Picture Network"

R. Gilbert Jost, M.D.

**I**T IS INTERESTING and somewhat nostalgic for me to re-read this paper, written over 15 years ago, which captured our view of the future of picture archiving and communications systems (PACS). Many of our assumptions were pretty much on target. The campus-wide picture network described here assumed what was then a rather heretical notion that centralized computing would give way to distributed systems, that computer terminals would routinely be replaced by workstations,

routine transmission of digital images was to be realized using CATV networks.

The scale of the problem was perceived to be different then. Note that the average number of images per magnetic resonance imaging (MRI) study in 1985 was 24, with just over 2,000 MRI exams performed per year. Also, at that time a 1024 x 1024 image display system was an expensive commodity and efforts were made to "time share" the system among several users.

Many of us assumed that PACS develop-

# nanotechnology risks, benefits, and regulation

mer<sup>1</sup> and Susanna H. Priest

communications, University of South Carolina, Columbia, SC 29208, USA

ism and Media Studies, University of Nevada, Las Vegas, NV, USA

✉ John C. Besley  
Email: [jbesley@sc.edu](mailto:jbesley@sc.edu)

Received: 23 March 2007 Accepted: 16 October 2007 Published online: 8 November 2007

**Abstract** A survey of American (US) nanotechnology researchers ( $N = 177$ ) suggests a diversity of views about what areas are most important to the burgeoning field, as well as perceptions about the overall benefits and risks of such research. On average, respondents saw a range of technologies as key and viewed public health and environmental issues as areas where both risks and the need for regulation are greatest. These areas were also where respondents said current regulations were least adequate. Factor analyses of the survey questions suggest that, when considering both risks and regulations, respondents make a distinction between health and environmental risks, and what might be termed “social risks” (e.g., invasion of privacy, use of nanotechnology in weapons, and economic impacts).

**Keywords** Nanotechnology - Expert - Opinion - Survey - Risk - Societal implications

## Introduction

Social scientists have begun to study what—if anything—regular citizens think about nanotechnology (Barnett et al. 2006), but these researchers have focused

**ⓘ Please determine the appropriate registration option.**

Registration is intended only for individuals to enable use of the personalization and management features on SpringerLink.

**■ Individuals**

If you subscribe to a Springer online publication and do not have access, please:

- 1) Register as an individual if you are not already.

Register Individual

- 2) Send an email with your MetaPress ID, the name on the subscription, and order details to the SpringerLink helpdesk.

In the Americas: [springerlink-ny@springer.com](mailto:springerlink-ny@springer.com)

Outside the Americas: [springerlink@springer.com](mailto:springerlink@springer.com)

**■ Others**

Institutions, consortia, societies, editorial boards and other organizations wanting online access to their subscriptions that are not yet registered as a SpringerLink customer, need to contact the helpdesk. Institutions need to sign the SpringerLink contract that will be sent to them by the helpdesk.
