Direction: HOW to use SpringerLink?

GO to: <http://www.car.chula.ac.th/curef-db/slist.html#generall#> and select SpringerLink. The database is iredy with homepage screen as figure below.

Browse publications

User can:

- ① Browse publications by content type: journals, books, e-references, protocols,
- ② Browse specific title of any publications,
- ③ Browse by selecting required collections.

Search Publications

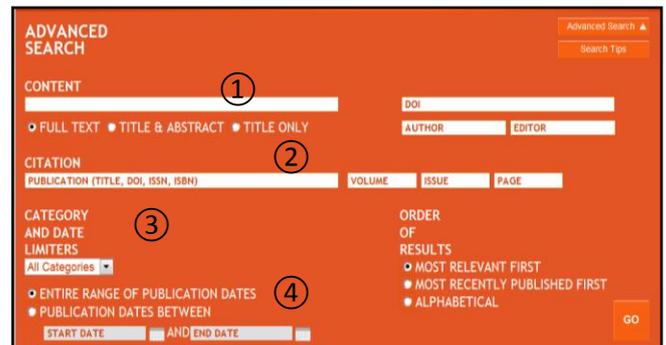

For searching, *quick search* and *advanced search* are provided.

① **Quick Search**, simply type word or phrase into the SEARCH FOR box, and click GO.

② Advanced Search

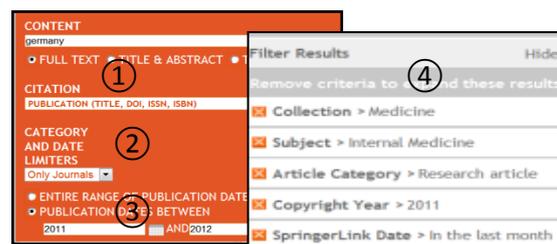

Advanced Search allows user to formulate search according to his interest, and he will be able to refine search to suit his own need as well.

Steps of Advanced search

- ① Type “word or phrase” or “DOI” no., or “author’s/editor’s name” into the content box
- ② Type specific citation (title, DOI, ISBN, ISSN), including volume, issue, and page no.
- ③ Select category limiter (all categories/ journals only/ books only/ protocols only)
- ④ Limit publication date range, and click GO.

Advanced search sample

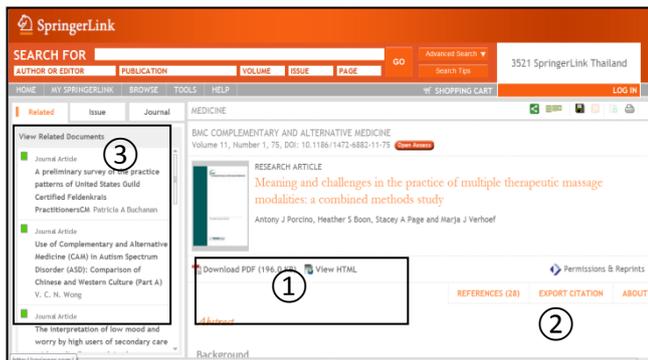

Advanced Search Sample (Contd.)

① Use a very broad term “Germany”, ② narrow it with Journals only, and ③ select publication dates between 2011 and 2012.

To make the results more specific, ④ use *Filter These Results* option, limiting to Internal Medicine subject, research article only, copyright in 2011, and with SpringerLink date within the last month.

Search Results

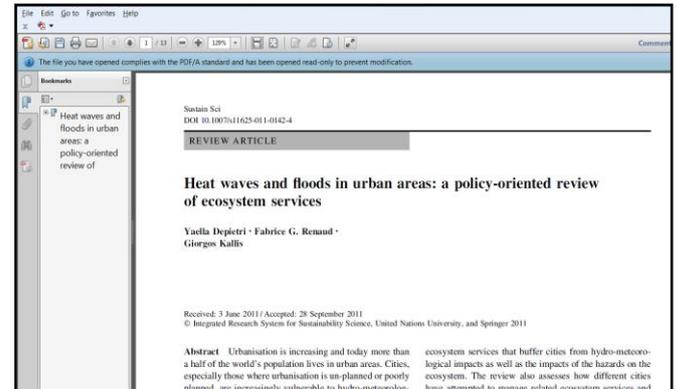

User can utilize and manage the search results in different ways by the followings:

- ① Print/save full text article from PDF file, HTML,
 - ② Export citation, and
 - ③ View related documents.
- Select required article/chapter from search results
 - Click  to view HTML full text file

- Click  to open full text file, click File on menu bar and then click Save as...

- To print, click File on menu bar and click Print
- Click “Export citation” and select **EndNote** from **Citation Manager** to export the bibliographic data, and click then Export citation, Open, and Library to continue managing the information to suit the user’s own need.

Note: From the search results, user can select as many titles at once as required, by opening Library from EndNote program first before searching the database. All exported citations will be automatically added into the Library.

- To enhance search results, click View related documents, from this option user also can download the required bibliographic information by following the steps above.

Close SpringerLink

Click **X** on the top-right to **EXIT** SpringerLink
